A free "PDF printer" can be downloaded and installed from the following website:

<http://www.cutepdf.com/Products/CutePDF/writer.asp>

Please choose the '[GET Zipped Setup](#)' option from the left menu and execute BOTH installation programs inside the zip file. Remember to run the installers in **administrator mode** for either Windows 7 or Windows Vista.

## Note: You may get a warning when unzipping this file because it contains **.EXE** files, which are executable programs. It is safe to ignore the warning and proceed anyway. ##
